# LED Cabinet light

1. Paste the double-side tape to the back of the metal clip.

2. Peel off the protective films on the double-side tape.

3. Attach the cabinet light with metal clips to the surface of the target position.

4. After installation, the light is magnetically attached on the metal clip and can be taken off at any time.

## Tips:

1. The cabinet light can be directly fixed on the surface of an iron product.
2. If the light is idle for a long time, please charge it at least once every three months for the sake of a longer battery service life.
3. The built-in magnets are placed at the end of the cabinet light. (About 0.78 inch away from the charging port)
