

VOLTRON

CONTACT THERMOSTAT

Unipolar, encased thermostat with switch contacts complete with cable clamp, It is particularly suitable for measuring temperatures on heating plant pipes and other uses.

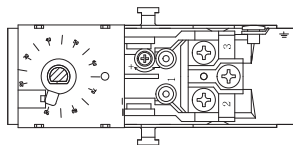

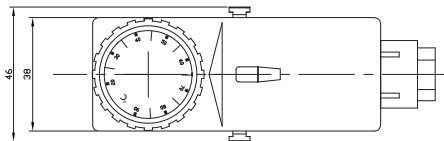

Thermostat clamping is achieved by means of spring-band, assuring good contact and fixing to pipes.

SISTEM OF CONNECTION

- 1 Terminal = Common inlet
- 2 Terminal = Outlet (opens the circuit with increasing temperature)
- 3 Terminal = Outlet (closes the circuit with increasing temperature)

TECHNICAL DATA

Temperature range	20°/90° C
Temperature differential	Dt ±7° C
Contacts	Ag 1000/1000
Contacts rating	15A (2.5) 250V~
Cut-off or switching contacts	
Number of automatic cycles	II (100.000)
Temperature rate of change	1 K/min
Degree of protection	IP 20

SCREW FOR REGULATING SENSITIVITY DIFFERENCE
